

RBC LIFE SCIENCES™

PIONEERING NANOTECHNOLOGY IN NUTRITIONAL SCIENCE

March 21, 2006

To Whom It May Concern:

This letter is being written to commend Access Technology Solutions for the innovative services they have created to help us run a Not-For-Resale (NFR) program in Japan.

Access helped us successfully implement our Japanese NFR program with a fully localized website, along with Japanese payment systems for RBC product purchase, commission payment, native-Japanese speaking customer service, electronic customs clearance in Japan. Access has brought us a great deal of expertise and I appreciate the fact that Access has been with RBC every step of the way on our journey in Japan

We find Access to be not just a technically competent and efficient firm, but our who genuinely cares about RBC's success. We are thrilled to have Access at our disposal.

As the Vice President of RBC, I am extremely happy to recommend Access to anyone in the direct selling industry who has a vision to expand their international market to Japan.

Sincerely,

Trevor Scofield, CA
VP International Operations
